PROFILE

Computer Engineering student, specialized in Software Engineering and Full-Stack development. Passionate about designing and developing web and mobile applications, with skills in Java, Spring Boot, REST APIs, Python, Next.js and databases, acquired through several academic projects and practical experiences. Looking for a 6-month PFE internship starting February 2027 to apply my skills and contribute to real-world software projects.

PROFESSIONAL EXPERIENCE

Frontend Developer Intern (Next.js) | NichanLabs, Errachidia | June 2025 - August 2025

- Participation in the development of a school management platform within a project team.
- Development of the user interface with Next.js and Tailwind CSS.
- Integration of REST APIs developed with NestJS and connected to a MongoDB database.
- Teamwork using GitHub for version control, Jira for task tracking and Postman for API testing.

ACADEMIC PROJECTS

Medical Practice Management Application | Spring Boot, MySQL

- Development of an application for managing patients, doctors and medical records.
- Implementation of a consultation request management system with approval or rejection by the administration.
- Development of a secure REST API with Spring Boot and data persistence with MySQL.

Vehicle Management and Sales System | Java, JavaFX, PostgreSQL, Elasticsearch, Kibana

- JavaFX desktop application for managing vehicles, customers and sales, with PostgreSQL for data storage.
- Use of Elasticsearch and Kibana for advanced search, data visualization and logs.

Application Based on a Microservices Architecture | Spring Boot, REST API, Microservices

- Design and development of an application split into several independent microservices with Spring Boot.
- Communication between services via REST APIs, with a clear separation of responsibilities and data.

Other projects

Intelligent Multimedia Analysis System | Python, Flask, Machine Learning, SQLite

- Analysis of YouTube videos and academic content, generation of summaries (text and key images).

Attendance Management by Facial Recognition | Python, Flask, Deep Learning

- Employee identification using Deep Learning, automatic attendance tracking.

Web Application for Teaching Unit Assignment | PHP, JavaScript, Bootstrap, MySQL

- Management of teaching units and professor assignments.

Enterprise Management Application | C++, Qt

- Desktop application for managing employees and inventory.

Leave Management System | C

- Management of employee leave requests and approvals.

TECHNICAL SKILLS

Domains: Software Engineering, Full-Stack (Frontend/Backend), REST APIs, Microservices, OOP, Databases (SQL/NoSQL)
Programming languages: C, C++, Java, Python, JavaScript, PHP, SQL, HTML, CSS
Frameworks: Spring Boot, React.js, Next.js, Flask, Bootstrap, Tailwind CSS, Angular
Databases: MySQL, PostgreSQL, MongoDB, SQLite, Oracle DB
Data search and visualization: Elasticsearch, Kibana
Tools and technologies: Git, GitHub, Jira, Postman, Docker, JavaFX, Visual Studio Code, Qt Creator, Canva, Excel, Word, PowerPoint
Operating systems: Linux
Soft skills: Project management, communication, teamwork, problem solving, critical thinking, autonomy

EDUCATION

Engineering Cycle — Computer Engineering
École Nationale des Sciences Appliquées d'Al Hoceima, Morocco **2024 - 2027**

Integrated Preparatory Cycle
École Nationale des Sciences Appliquées d'Al Hoceima, Morocco **2022 - 2024**

Baccalaureate, Mathematical Sciences A (French option)
Lycée Salah Eddine El Ayoubi, Tinghir, Morocco **2021 - 2022**

LANGUAGES

Arabic: Native language | **French:** Fluent | **English:** Intermediate level (B1/B2)

INTERESTS

Personal development projects, reading, sports.
